TKNT Foundation

# TKNT Foundation

TKNT is a platform that provides Defi services with an ERC-20-based utility token. Starting with the launch of a decentralized staking service in September 2020, TKNT will introduce a variety of Defi products such as landing, staking and swaps. Technical support is provided by Dexfi, consisting of renowned white hackers.

Throughout a partnership with TKN.COM, No.1 cross-blockchain Defi gaming Dapps, TKNT can bet-mined only through games within TKN.COM. There was no ICO or private sale.

TKNT is a new concept of Defi project composed of a combination of DeFi and Bet Mining, and pursue to build a system that enables entertainment and in-app payment in all DApps based on ERC-20, combining various financial services.

# TKNT Economy

TKNT has no additional issuance from the first issued 1,000,000,000 TKNT, and as the ecosystem such as transactions, staking, and financial services expands, the distributed TKNT funds are executed as follows.

- Strategic Partners: Lockup 6 months, 5% vesting per month
- Team & Founders: Lockup 1 year, 5% vesting per month

---

**Token name : TKNT (TKN TOKEN)**

**Supply : 1,000,000,000 TKNT**

**Issuance Method : ERC-20**

**Type : Utility Token, Mining**

**Decimals : 18**

# TKNT Bet Mining

On gaming platforms where TKNT is listed, users can mine TKNT according to their bet amount, and can mine anytime, anywhere, just through their phone or PC. TKNT can be only achieved by bet-mining at TKN.COM or be purchased in exchanges at the moment.

As every 10m units of TKNT mined, double-halvening starts, which means, now user can get 1 TKNT by playing 8USDT worth of betting (previously 2USDT, before 1st halvening at September), and at 2nd halvening, user can get 1TKNT by playing 34USDT worth of betting with their BTC, ETH, USDT, or TKNT. This process allows tokens to have both transactional and intrinsic value, which provides the basis power to TKNT Foundation in the market.

※Average bet amount is not the amount you lose with rolling.

How much TKNT is mined per bet?

1st stage : 2 USDT → BET Mine 1 TKNT

2nd stage : 8 USDT → BET Mine 1 TKNT

3rd stage : 32 USDT → BET Mine 1 TKNT

4th stage : .

5th stage : .
